

Scanmaster

Ultrasound Bladder Scanner for volume measurement

Why Scanmaster for bladder volume measurement?

- Easy to use
- Non-invasive
- Accurate and reliable measurements
- Runs on computers using Windows XP/Vista/7/8
- Integrated with MMS Urodynamic systems Nexus, Solar, Solar Blue and Flowmaster
- Accessories: trolley, clamps, netbook
- Software installation via USB/Flash drive
- Can be utilized in clinical areas where ultrasound is beneficial but until now too expensive

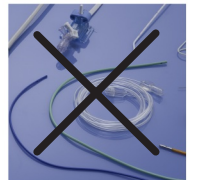

'All you need is a USB ultrasound probe and a small computer running Windows'

Clinical benefits

- Eliminates unnecessary trauma to patient
- Diagnose urinary retention
- Diagnose need for catheterization
- Prevent unnecessary catheterization
- Helps reduce Urinary Tract Infection
- Monitor post-operative recovery
- Helps diagnose different types of incontinence
- Reduces cost of disposables and saves staff time

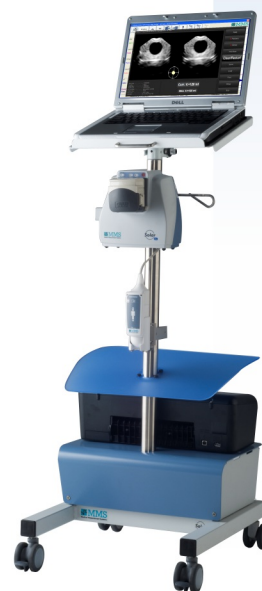

*'All you need is a USB ultrasound probe
and a small computer running Windows'*

*To be used in offices, general
hospitals and university centers*

Indication for use of Scanmaster

- Diagnoses urinary dysfunction
- Differentiates urological problems more efficiently
- Differentiates the types of incontinence
- Evaluates urinary retention and post operative urinary retention
- Measures Post-Void Residual (PVR)
- Verifies empty bladder
